

Exhibit 1

UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF PENNSYLVANIA

IN RE: NATIONAL FOOTBALL LEAGUE PLAYERS'
CONCUSSION INJURY LITIGATION

Kevin Turner and Shawn Wooden, on behalf of themselves
and others similarly situated,

Plaintiffs,

v.

National Football League and NFL Properties LLC,
successor-in-interest to NFL Properties, Inc.,

Defendants.

No. 2:12-md-02323-AB

MDL No. 2323

Hon. Anita B. Brody

CIVIL ACTION NO: 2:14-cv-
00029-AB

THIS DOCUMENT RELATES TO:
ALL ACTIONS

**DECLARATION OF CO-LEAD CLASS COUNSEL CHRISTOPHER A. SEEGER
IN SUPPORT OF FINAL APPROVAL OF SETTLEMENT
AND CERTIFICATION OF CLASS AND SUBCLASSES**

Christopher A. Seeger declares, pursuant to 28 U.S.C. §1746, based upon his personal
knowledge, information and belief, the following:

INTRODUCTION

1. I was appointed by the Court in *In re National Football League Players' Concussion Injury Litigation*, MDL No. 2323 (E.D. Pa.) to serve as Plaintiffs' Co-Lead Counsel and as a member of the Plaintiffs' Executive Committee ("PEC") [ECF No. 64]. I was the principal negotiator and architect of the Class Action Settlement ("Settlement") dated June 25, 2014 between the Plaintiff Class and the Defendants National Football League and NFL Properties LLC (collectively, the "NFL Parties") [ECF No. 6073-2], which was preliminarily

approved on July 7, 2014 [ECF No. 6084, ¶ 3(b)]. This Settlement represents the proposed resolution of more than 5,000 lawsuits in this MDL and thousands of additional Retired NFL Football Players' claims against the NFL Parties for injunctive relief, medical monitoring, and compensation for the long-term cognitive injuries and other losses suffered by them allegedly as a result of the NFL Parties' tortious conduct. In connection with the Settlement, I was appointed to serve as Co-Lead Class Counsel. I am fully familiar with the claims asserted in this litigation and the array of potential defenses of the NFL Parties, including motions to dismiss on grounds of preemption under Section 301 of the Labor Management Relations Act ("LMRA"). I submit this Declaration in support of Class Counsel's Motion for Final Approval of the Settlement and Certification of the Class and Subclasses.

2. I have extensive experience in class actions, mass torts, and multidistrict litigation. In at least twenty cases, I have been appointed to leadership positions as Plaintiffs' Lead Counsel and/or a member of the Plaintiffs' Executive Committee or Steering Committee, and I have served as Class Counsel in many of these actions. *See, e.g., In re Testosterone Replacement Therapy Prod. Liab. Litig.*, MDL No. 2545 (S.D. Ill.) (Kennelly, J.) (Co-Lead Counsel); *In re Vioxx Prod. Liab. Litig.*, MDL No. 1657 (E.D. La.) (Fallon, J.) (Co-Lead Counsel); *In re Zoloft Prod. Liab. Litig.*, MDL No. 2342 (E.D. Pa.) (Rufe, J.) (member of Plaintiffs' Steering Committee); *In re Tylenol Marketing, Sales Practice and Prod. Liab. Litig.*, MDL No. 2436 (E.D. Pa.) (Stengel, J.) (member of Plaintiffs' Steering Committee); *In re Fresenius Granuflo/Naturalyte Dialysis Prod. Liab. Litig.*, MDL No. 2428 (D. Mass.) (member of Plaintiffs' Executive Committee); *In re Actos (Pioglitazone) Prod. Liab. Litig.*, MDL No. 2299 (W.D. La.) (Doherty, J.) (member of Plaintiffs' Steering Committee); *In re Gadolinium-Based Contrast Agents Prod. Liab. Litig.*, MDL No. 1909 (N.D. Ohio) (member of Plaintiffs'

Executive Committee); *In re Chinese-Manufactured Drywall Prod. Liab. Litig.*, MDL No. 2047 (E.D. La.) (Fallon, J.) (member of Plaintiffs' Steering Committee and Chair of Trial Team); *In re DePuy Orthopaedics ASR Prod. Liab. Litig.*, MDL No. 2197 (N.D. Ohio) (member of Plaintiffs' Executive Committee); *In re Zyprexa Prod. Liab. Litig.*, MDL No. 1596 (E.D.N.Y.) (Liaison Counsel); *In re Ortho Evra Prod. Liab. Litig.*, MDL No. 1742 (N.D. Ohio) (member of Plaintiffs' Steering Committee); *In re Vytorin/Zetia Marketing, Sales Practices & Prod. Liab. Litig.*, MDL No. 1938 (D.N.J.) (Co-Liaison Counsel); *In re Fosamax Prod. Liab. Litig.*, MDL No. 1789 (S.D.N.Y.) (Liaison Counsel and member of Plaintiffs' Steering Committee); *In re Yasmin and Yaz (Drospirenone) Marketing, Sales Practices, and Relevant Prod. Liab. Litig.*, MDL No. 2100 (S.D. Ill.) (member of Plaintiffs' Steering Committee); *In re Bextra and Celebrex Marketing Sales and Prod. Liab. Litig.*, MDL No. 1699 (N.D. Cal.) (member of Plaintiffs' Steering Committee); *In re Phenylpropanolamine (PPA) Prod. Liab. Litig.*, MDL No. 1407 (W.D. Wash.) (member of Plaintiffs' Steering Committee); *In re Propulsid Prod. Liab. Litig.*, MDL No. 1355 (E.D. La.) (member of Plaintiffs' Steering Committee); *In re Guidant Corp. Implantable Defibrillators Prods. Liab. Litig.*, MDL 1708 (D. Minn.) (member of Plaintiffs' Steering Committee); *In re Rezulin Prod. Liab. Litig.*, MDL No. 1348 (S.D.N.Y.) (Kaplan, J.) (member of Plaintiffs' Steering Committee).

3. In addition, I have been recognized as one of the top 50 Litigation Trailblazers and Pioneers in the country by the National Law Journal and one of the top 500 leading lawyers in America by Lawdragon. I serve as a member on the Advisory Board of the Center on Civil Justice at NYU School of Law. I also serve on the Advisory Board of the Center for Judicial Studies at Duke University School of Law. I am a Fellow of the International Society of Barristers. I have been invited to be a guest lecturer on aggregate and class action settlements at

NYU School of Law, Vanderbilt University Law School, Benjamin N. Cardozo School of Law, Seton Hall University School of Law, and other law schools. I have been invited to speak numerous times at Continuing Legal Education seminars on the art of negotiating and settling mass tort cases.

4. In the course of my career, I have tried multiple bellwether cases in mass tort litigation and I have negotiated numerous national class and aggregate settlements that have achieved final court approval and have provided significant financial benefits to tens of thousands of victims suffering catastrophic and other personal injuries, including brain injuries related to strokes. For example, in my role as Co-Lead Counsel for the Plaintiffs' Steering Committee in *Vioxx*, I led a team of over 100 plaintiffs' firms and was responsible for the overall litigation strategy against the drug manufacturer for approximately 27,000 individual cases involving injuries of heart attack, stroke, and sudden cardiac death. Following over 18 separate trials in that case, I was a lead negotiator for an aggregate settlement totaling \$4.85 billion. Similarly, in *PPA*, I negotiated a \$200 million settlement on behalf of stroke victims alleging injuries from the appetite suppressant Dexatrim. *See PPA*, 227 F.R.D. 553 (W.D. Wash. 2004); *see also DePuy Orthopaedics* (\$2.5 billion settlement involving hip injuries); *Zyprexa* (\$1.2 billion settlement for injuries including diabetes and weight gain); *Yaz* and *Ortho Evra* (settlements involving pulmonary embolism and deep vein thrombosis injuries); *Gadolinium* (settlement of claims alleging nephrogenic systemic fibrosis/nephrogenic fibrosing dermopathy, a debilitating condition that often results in organ failure and death); *Rezulin* (settlement involving liver injuries); *Chinese Drywall* (after several successful bellwether trials, settlements valued at \$1.1 billion were achieved to remediate properties damaged by Chinese drywall and provide other benefits to approximately 10,000 plaintiffs).

5. Over many years, I have gained a comprehensive understanding of appropriate and viable structural frameworks for complex settlements, along with the overarching legal issues and constructs that are common to global resolutions in mass torts and MDL litigation. In addition, I have acquired an appreciation of the ranges of valuations that courts, juries, and experts place on various types of alleged injuries, as well as the risks, including difficulties proving liability and causation, inherent delays, and expenses involved in trying these cases.

6. Generally, when negotiating a class settlement, there are a host of factors that must be taken into consideration by Class Counsel. First, an evaluation of the strength of the plaintiffs' claims, individually and collectively, is of vital importance. This includes an analysis of: (i) the types of alleged injuries and their range of values generally in the tort system (*i.e.*, for personal injuries, whether they are active/latent, temporary/permanent, acute/chronic, and/or life-threatening/fatal, the nature and extent of any alleged mental and physical disabilities, and the degree of pain and suffering involved); (ii) the state of the science supporting the claims, *i.e.*, whether there are peer-reviewed articles, epidemiological studies, and/or clinical trials linking plaintiffs' injuries to the defendant's product or drug, and whether the plaintiffs' injuries can be considered "signature injuries" (*e.g.*, mesothelioma/asbestos or adenosis/DES) or whether they are common in the general population; (iii) the plaintiffs' risk factors; (iv) the magnitude of the problem (*i.e.*, the size and make-up of the proposed class); and (v) the results of any bellwether trials and the expectations of favorable verdicts, among other factors.

7. Class Counsel must also evaluate the risks of litigation in the event a settlement is not achieved, including: (i) all potential defenses, such as preemption, lack of causation, statutes of limitations, etc.; (ii) inherent delays in payment to seriously injured plaintiffs even if plaintiffs' verdicts are achieved; (iii) appeals from favorable verdicts; (iii) possible insolvency of

the defendant; and (iv) whether the costs of litigating individual cases outweigh potential individual recoveries, among other things.

8. It is Class Counsel's duty to consider the class as a whole when negotiating a global resolution of plaintiffs' claims and then attempt to achieve the best possible overall result under the circumstances, which is fundamentally fair, reasonable, and adequate. In my experience, it is usually not possible to gain through a class settlement compensation for every alleged injury or condition (and in this case, as shown below, it was not possible to do so). Defendants are willing to risk opt-outs for certain injuries that they perceive to be weak and/or without merit. Similarly, mass settlements rarely settle on the basis of a defendant's ability to pay.

9. The ground-breaking global resolution before the Court in these proceeding is the result of many months of intense, hard-fought, arm's-length negotiations between the parties, encompassing collectively thousands of hours of professional time with input from medical, actuarial, and other experts. If approved, this Settlement will establish a \$75 million Baseline Assessment Program ("BAP") designed to determine the existence and extent of cognitive impairment in living Retired NFL Football Players. In the event they are found to suffer from moderate cognitive impairment ("Level 1 Neurocognitive Impairment"), they will be entitled to supplemental benefits in the form of medical treatment and/or evaluation, including counseling and pharmaceutical coverage. The Settlement will also create an uncapped Monetary Award Fund ("MAF") to provide much-needed relief to (i) seriously injured retired players with a "Qualifying Diagnosis" of Level 1.5 Neurocognitive Impairment (early dementia), Level 2 Neurocognitive Impairment (moderate dementia), Alzheimer's Disease, Parkinson's Disease, and/or Amyotrophic Lateral Sclerosis ("ALS"), (ii) the representatives of deceased players who

received a Qualifying Diagnosis while living, and (iii) the representatives of certain players who died before Preliminary Approval (July 7, 2014) and were diagnosed post-mortem with Chronic Traumatic Encephalopathy (“CTE”), and their families. In order to receive a monetary award, Class Members will not be required to prove that their injuries were caused by the NFL Parties, let alone concussions suffered during professional football play. Another component of the Settlement is a \$10 million Education Fund to promote safety and injury prevention in football players, including youth football players, and to educate retired players regarding the NFL’s medical and disability benefits programs and initiatives.

10. Significantly, the Settlement preserves Retired NFL Football Players’ rights to pursue claims for worker’s compensation and any and all medical and disability benefits under any applicable collective bargaining agreement, including the NFL’s Neuro-Cognitive Disability Benefit.¹ In addition, the Settlement will ensure that the provision included in Article 65 of the current CBA, Section 2 – requiring that players execute a release of claims and covenant not to sue in order to be eligible for the NFL’s Neuro-Cognitive Disability Benefit – will not be enforced or used against Settlement Class Members in connection with this Settlement.²

11. Plaintiff Shawn Wooden is the Subclass Representative for Subclass 1, which includes Retired NFL Football Players who were not diagnosed with a Qualifying Diagnosis prior to preliminary approval of the Settlement, and their Representative Claimants and Derivative Claimants.³ Mr. Wooden played professional football in the NFL from 1996-2004.

¹ Settlement Agreement, Section 18.6.

² Settlement Agreement, Section 29.1.

³ Previously, Retired NFL Football Player Corey J. Swinson agreed to serve as the Subclass 1 Representative. Sadly, he passed away suddenly and unexpectedly on September 10, 2013. As a retired player who did not have a Qualifying Diagnosis, Mr. Swinson had standing to assert the rights of Subclass 1 members and he was an adequate representative for the undiagnosed players. During the negotiations of settlement terms in the summer of 2013, Mr.

During his NFL career, he experienced repeated traumatic head impacts, and since his retirement from football, he has experienced neurological symptoms, including migraine headaches, sleep problems, concentration issues, and mood swings. Mr. Wooden has not been diagnosed with any neurocognitive impairment, but is at increased risk of developing a range of neuromuscular and neurocognitive diseases associated with mild traumatic brain injuries and as alleged in the Complaints, such as dementia, Alzheimer's Disease, Parkinson's Disease, and/or ALS as a proximate result of having played professional football in the NFL. He therefore has standing to assert the rights of Subclass 1 members and is an adequate representative for the undiagnosed players who are at increased risk for developing a Qualifying Diagnosis during their lifetime.

12. Plaintiff Kevin Turner is the Subclass Representative for Subclass 2, which includes Retired NFL Football Players with a Qualifying Diagnosis prior to preliminary approval of the Settlement, and their Representative Claimants and Derivative Claimants, and the representatives of deceased players who received a Qualifying Diagnosis while living or who died prior to preliminary approval and were diagnosed post-mortem with CTE. Mr. Turner played professional football in the NFL from 1992-1999. In June 2010, he was diagnosed with ALS. As his disease has progressed, his quality of life has been increasingly impaired. Mr. Turner has experienced a severe decline of muscle movement, motor function and an ability to speak. He is no longer able to feed himself, brush his teeth, shave, bathe or dress himself, and he requires round-the-clock assistance with even the simplest, most basic routine activities. He has been hospitalized numerous times and, due to severe dehydration and an inability to eat properly,

Swinson, Subclass 1 Counsel Arnold Levin, and I conferred concerning the terms of the proposed Settlement. Prior to his death, Subclass 1 Counsel Arnold Levin and I met with Mr. Swinson. Mr. Swinson was aware of and agreed to the terms of the Settlement and he reviewed drafts of the Term Sheet before it was executed.

Mr. Turner has recently required the insertion of a feeding tube. Mr. Turner has standing to assert the rights of Subclass 2 members and is an adequate representative for them.

FACTUAL BACKGROUND

13. From the outset of this litigation, Plaintiffs have been mindful of the strength of their claims for injuries and damages that allegedly flowed as a result of time spent playing football in the NFL, and the serious challenges and defenses that could be raised by the NFL Parties in a litigation setting. In July 2011, the first lawsuit was filed by Retired NFL Football Players related to the NFL Parties' alleged actions (and inactions) with regard to alleged concussion-related injuries. Shortly thereafter, similar suits were filed in various jurisdictions on behalf of groups of other retired players. This MDL was established on January 31, 2012, when the Judicial Panel on Multidistrict Litigation transferred these pending actions to the Eastern District of Pennsylvania pursuant to 28 U.S.C. § 1407. *See In re National Football League Players' Concussion Injury Litig.*, 842 F. Supp. 2d 1378 (J.P.M.L. 2012). Since then, more than 5,000 former players filed substantially similar lawsuits in the MDL and in state courts around the country. The NFL Parties removed all state cases to federal court on the basis of federal preemption under the LMRA.

14. Following the formation of the MDL, the Court appointed the PEC, another Plaintiffs' Co-Lead Counsel, Sol Weiss of Anapol Schwartz, and a Steering Committee composed of various counsel for Plaintiffs in the *NFL Players' Concussion Injury* cases pending before the Court [ECF No. 72]. All of the attorneys appointed to the PEC and the Steering Committee demonstrated extensive experience in and impressive credentials for representing Plaintiffs alleging personal injuries in class actions and multidistrict litigation.

15. Plaintiffs filed a Master Administrative Long-Form Complaint [ECF No. 83], which was later amended [ECF No. 2642], and a Master Administrative Class Action Complaint for Medical Monitoring [ECF No. 84]. In those Complaints, Plaintiffs alleged that retired football players have suffered or are at risk of suffering a broad range of injuries or conditions associated with repeated head impacts sustained during professional football play, including early-onset of Alzheimer's Disease, dementia, ALS, depression, deficits in cognitive functioning, reduced processing speed, attention and reasoning, loss of memory, sleeplessness, mood swings, personality changes, and CTE, which is only firmly diagnosed post-mortem by examining brain tissue. *See* ECF No. 84, ¶ 58; ECF No. 2642, ¶ 74.

16. As Plaintiffs' counsel, we were aware of mainstream medical literature linking traumatic brain injury to an increase in the likelihood for developing early-onset dementia, Alzheimer's Disease, Parkinson's Disease, and ALS. With regard to CTE, the medical literature and experts reflect that CTE is a pathologic determination rendered post-mortem from examination of brain tissue. Based on accounts from patients and family members, early reports in the medical literature also implicated certain symptoms in connection with CTE, such as depression, anger, mood swings, memory loss, attention deficits, and cognitive problems including dementia. Alzheimer's Disease, Parkinson's Disease, and ALS were similarly seen in patients with CTE pathology. The nature of those case reports, though, were anecdotal and subject to potential bias, and would have been subject to substantial evidentiary and legal challenges in contested litigation.

17. Moreover, the conditions and complaints of depression, anger, and mood swings, while serious and concerning, are not "signature injuries." In other words, they have not been scientifically connected in a one-to-one manner to concussions/mild traumatic brain injury, such

that reliable conclusions about the cause of depression, for example, in a football player can be determined by the mere presence of depression. Scientifically, there are many known causes (or suspected causes) of mood and behavioral problems, and such conditions are prevalent in the general population independent of participation in football or known mild traumatic brain injury. The wide prevalence of treatment and medication use for such conditions in the general population further makes it a matter of common understanding.

18. We were aware of the literature regarding traumatic brain injury and CTE. Indeed, I was aware of the early literature on dementia pugilistica, as well as the more modern reports of CTE, well before the first complaint was filed in this MDL. I and others on the PEC, together with experts we have consulted with, have monitored the scientific literature as it has evolved during the pendency of this litigation. What was true at the outset of the litigation remained true during the negotiations of the Settlement Agreement with the NFL Parties, and is still the case today. First, CTE is a pathologic diagnosis that is rendered after death. Second, the symptomology that has been reportedly associated with the post-mortem diagnosis of CTE is symptomology that has many etiologies and is not signature in nature. Third, the type of prospective scientific studies (as opposed to anecdotal case reports and case series) characterizing the clinical presentation, symptoms, risk factors, and background risk in non-mild traumatic brain injury patients have not been performed, and will take well beyond the near-term to achieve. In the context of litigation, the state of the science is something that any trial lawyer evaluating cases like this considers in evaluating how to proceed – whether through litigation, trial, or settlement. We therefore considered the state of science when evaluating the strengths and weaknesses of our claims related to CTE. We also considered these same issues with respect to all the other diseases and conditions on which our case was based.

19. Consistent with our fiduciary duties to zealously represent the interests of all Retired NFL Football Players and their families, early on the Plaintiffs' negotiating team carefully evaluated the potential to settle Plaintiffs' claims on a class basis. We took into consideration the significance and severity of the alleged injuries (some of them fatal), the science issues relative to causation and concussions, and our ability to achieve through settlement "full value" compensation for serious concussion-related injuries without trials and appeals. We also weighed the inherent delays and costs involved in protracted litigation where so many former players are extremely ill and dying, as well as the risks of litigation, including the array of potential defenses of the NFL Parties, particularly preemption, but also lack of causation, statutes of limitations, statutory employer, and assumption of risk, among others. Given the Court's determination at the outset, even before discovery, to address the threshold question whether the Plaintiffs' claims were preempted under federal law [CMO 2 at 2, ECF 64], there was a real threat to the viability of Plaintiffs' case.⁴

20. It was clear to us from the outset that the success of the litigation did not turn on the NFL's knowledge or awareness of the underlying facts, but, rather, on the scientific evidence supporting Plaintiffs' claims and the legal strengths and vulnerabilities presented. In other words, it was not necessary to obtain through formal discovery of the NFL Parties the principal information we needed to frame the issues properly, analyze the relevant science, and assess potential legal hurdles, in order to negotiate the best deal for the Plaintiffs. We understood the need to conduct our own investigation through experts to assess Plaintiffs' claims of injury associated with football play, whether for purposes of litigation or resolution. Accordingly, we

⁴ Indeed, this was confirmed in the Court's Preliminary Approval Order: "Many, if not all, of Plaintiffs' claims could have been dismissed at this early stage of the litigation if the NFL Parties prevailed on the preemption issue." [ECF No. 6083, at 10].

created and maintained a comprehensive database of claims and symptoms of thousands of individual Plaintiffs, subject to the protections of the Health Insurance Portability and Accountability Act of 1996 (“HIPAA”), Public Law 104-91, 42 U.S.C. § 1320d-2. As a team, we worked with top medical and actuarial consultants to evaluate those claims and develop a model for global resolution of this litigation, because in our judgment, there was an opportunity to settle the claims on a class basis in a manner that would be beneficial to the Plaintiffs. We created a competent damages matrix and we researched all potential legal defenses.

21. Within the context of the broader risks of litigation before the parties – most notably, the risks presented by the pending motions to dismiss concerning preemption – I considered it incumbent on Plaintiffs’ counsel to pursue discussions concerning the serious conditions/diseases that players manifested while living, which were the subject of diagnosis and which players currently suffered from or were at risk of developing in the future. If an agreement with the NFL could be reached on such claims, it was important that claimants who wanted to press their claims for injuries that the NFL was unwilling to compensate in such an agreement would have the right to exclude themselves and maintain those claims in the manner they wished.

22. Accordingly, after thoroughly researching the state of the science regarding injuries associated with brain trauma and concussions, we approached the NFL Parties about the possibility of settlement, which the Court had encouraged. The parties thereafter engaged in discussions regarding settlement structures and injury categories. Through these talks, we learned which injuries the NFL Parties acknowledged should be compensated – and which they would be willing to compensate – in a global deal. The NFL Parties’ view was that a global settlement should compensate injuries that manifested in material neurocognitive impairment. In

other words, they were willing to negotiate compensation for only certain objectively verifiable and serious injuries, *i.e.*, dementia, Alzheimer's Disease, Parkinson's Disease, and ALS, which had been associated with traumatic brain injury and which manifested in living players. It was our perception that the NFL Parties were committed to litigating the claims of any opt-outs for any other conditions, which they considered to be less severe, transient, or not well supported by the science.

23. In my experience, the approach the NFL Parties took is not uncommon. In virtually every mass- or class-action settlement, there is considerable discussion among the parties about compensable versus non-compensable injury categories. Though plaintiffs can demand compensation for every disease or condition at issue (or symptom of that disease or condition), defendants often try to draw lines on the basis of principle, litigation risk, business risk, and/or cost. The commitment of a defendant to those "lines" is always tested in the negotiating process, and it was here. The discussions concerning compensable versus non-compensable injury categories were heated and repeated. Ultimately, they resolved in the manner framed in the Settlement Agreement before the Court.

24. Despite our initial talks with the NFL Parties, we did not negotiate any monetary terms. It was only after the parties fully briefed the preemption issues and the Court heard oral argument on the NFL Parties' motion to dismiss, and after the Court appointed a mediator, as described below, that the detail of a possible Settlement, including the compensation amounts and injury values were discussed.

25. In the meantime, we continued to litigate Plaintiffs' claims. We responded to Defendants' motion to dismiss on preemption grounds. After extensive briefing from the parties, the Court heard oral argument on this motion on April 9, 2013, but did not issue a ruling, leaving

both sides with uncertainty on this major issue. Currently, the NFL Parties' preemption motions remain pending.

MEDIATOR-SUPERVISED SETTLEMENT NEGOTIATIONS
RESULTING IN TERM SHEET ON AUGUST 29, 2013

26. In early July, 2013, in anticipation of the Court's decision on the preemption motions, the Court "held an informal exploratory telephone conference with lead counsel [and ordered the] parties, through their lead counsel, to engage in mediation to determine if consensual resolution [wa]s possible." [ECF No. 5128]. The Court appointed retired United States District Court Judge Layn Phillips to serve as the Mediator in this matter. *Id.* Under the supervision of Judge Phillips, the Plaintiffs and the NFL Parties began formal, vigorous, arm's-length discussions in good faith concerning a global settlement of Plaintiffs' claims. *See, generally*, Declaration of Judge Phillips dated January 3, 2013 [ECF No. 6073-4] and Supplemental Declaration of Judge Phillips dated November 11, 2014, filed herewith. The Court ordered Judge Phillips to report back to the Court with the results of mediation on or before September 3, 2013, and indicated that a ruling on the preemption motions would follow if a settlement was not reached by that date. *See* ECF No. 5128 ("I will not enter an order on the NFL's motion to dismiss until then.").

27. On behalf of the Plaintiffs I took the lead role in the negotiations with the NFL Parties and was present either in person or by telephone at every negotiation session. In addition to Co-Lead Counsel Sol Weiss, PEC members Steven C. Marks and Gene Locks, and Steering Committee members Arnold Levin and Dianne M. Nast – all attorneys with decades of class action and MDL litigation experience and scrupulous reputations – were brought into and played an active role in the mediation process. Additional PEC members David Buchanan and Larry Coben also participated.

28. We determined at the outset that a just and reasonable resolution of Plaintiffs' claims would require the creation of an NFL-funded program to evaluate retired players for evidence of neurocognitive impairment and a separate fund to fairly and adequately compensate those players found to be suffering from neuromuscular and neurocognitive injuries or diseases associated with concussive and sub-concussive head trauma.

29. We decided that a class settlement structured with two separate subclasses, each with its own independent representation and subclass counsel – (1) to include those Class Members who were not diagnosed with a qualifying injury but were at increased risk for suffering from neuromuscular or neurocognitive impairment due to their NFL football play, and (2) to encompass Class Members already diagnosed with a qualifying injury – would best serve all Class Members' interests and meet with Due Process. *See Petrovic v. Amoco Oil Co.*, 200 F.3d 1140, 1146, 1147-48 (8th Cir. 1999); *In re Diet Drugs*, 2000 WL 1222042, *50-51 (E.D. Pa. Aug. 28, 2000). Accordingly, after this structure was agreed to, Arnold Levin was designated to represent the players in Subclass 1 who have not yet received a diagnosis of neuromuscular or neurocognitive impairment, and Dianne Nast was tasked with representing the players in Subclass 2 who have received a qualifying diagnosis. The proposed Subclass Representatives (first, Corey Swinson, and then, Shawn Wooden after Mr. Swinson's death, and Kevin Turner), through communications with their counsel, stayed apprised throughout the negotiations of all material terms of the Settlement.

30. As part of our due diligence and consistent with our fiduciary responsibilities to the Class and Subclasses, we engaged multiple experts in the fields of: medicine, namely neurology, neuropsychology, and neuropsychiatry; actuarial science; economics; claims administration; and lien identification and satisfaction to determine, develop, and test an

appropriate settlement framework to evaluate and meet the needs of Retired NFL Football Players suffering from or at increased risk for the claimed injuries related to neuromuscular and neurocognitive impairment. The doctors advised us on the diseases associated with concussive head trauma, and their pathologies. The economists and actuaries assisted in modeling the possible disease incidence and adequacy of funding for the monetary award levels contained in the Settlement. Given the fact that some of the retired players are relatively young, we determined that the monetary award fund should be made available until the anticipated last retired player's death, from an actuarial standpoint. Thus, we agreed to a 65-year term for the Settlement, in order to provide all retired players an opportunity to seek compensation in the event they qualify for benefits.

31. For almost two months, the Plaintiffs' negotiating team worked at an intense and grueling pace, expending, collectively, thousands of professional hours and often working around the clock to negotiate a fair and reasonable class settlement on behalf of all Retired NFL Football Players, their Representative Claimants, and Derivative Claimants. Judge Phillips actively supervised numerous mediation sessions, which took place primarily at the offices of counsel for the NFL Parties in New York City. He presided over dozens of in-person and telephonic meetings with counsel for both sides, either jointly or in separate groups, and he regularly kept the Court apprised of the status of the settlement talks. Judge Phillips also met with the parties' respective experts to answer any questions he had regarding the scientific, actuarial, and financial aspects of the deal. As attested by Judge Phillips, the negotiations were conducted at arm's length, in good faith, and with an absence of conflict. *See Phillips Decl. at ¶¶ 2 & 5-7; Phillips Supp. Decl. at ¶ 4.*

32. Throughout the negotiations, we continually consulted with our experts regarding viable settlement options, in order to flesh out the details of a class settlement agreement that would meet the standards of Rule 23 and Due Process. We strived to obtain the best overall deal we could for the Plaintiffs, taking into consideration the projected incidence of Plaintiffs' injuries, the value of Plaintiffs' claims, the risks of litigation, including the pending motions to dismiss on grounds of preemption, and governing legal jurisprudence. Informed by our independent experts and based on our own vast and collective experience settling class actions and other mass torts to provide benefits to victims suffering personal injuries, we fought hard and went back and forth with the NFL Parties on a myriad of issues, including: settlement structures; baseline testing; compensable injury categories; monetary award values; necessary proofs for class membership and entitlement to benefits; appropriate offsets for monetary awards; the breadth of released claims; and payment of costs of settlement administration and class notice, among other things. Each of these issues involved many factors. We made demands on the NFL Parties, and the NFL Parties made counter-demands. The negotiations on all of these major aspects of the Settlement were vigorous, and sometimes they were quite contentious. During points of impasse, Judge Phillips intervened. Neither side was able to achieve all they hoped for, and both sides made concessions and trade-offs. Although it was our goal to achieve the greatest level of benefits for the Plaintiffs as a whole in the context of a reasonable settlement that the NFL Parties could accept, we remained prepared to resume litigation in the event a fair and adequate settlement could not be reached.

33. Class Counsel successfully insisted as a condition to settlement that retired players not lose their right to pursue claims for worker's compensation or benefits available under governing collective bargaining agreements by participating in the Settlement. In addition,

it was important that the NFL Parties agree not to enforce any releases or covenants not to sue previously signed by Class Members as a condition to receiving the NFL Neuro-Cognitive Disability Benefit pursuant to Article 65 of the current CBA. These releases would have prevented a number of Class Members from being able to partake in valuable Settlement benefits.

34. Ultimately, the mediation process culminated in the parties' execution of a Term Sheet containing the principal terms of a class Settlement on August 29, 2013. The parties agreed that a Settlement valued at \$765 million was sufficient (i) to create an Education Fund to make football safer and to educate retired players concerning available NFL medical and disability benefits programs and initiatives, (ii) to establish a Baseline Assessment Program to test all eligible retired players for evidence of cognitive impairment and provide supplemental medical treatment and pharmaceuticals for those players diagnosed with moderate impairment, and (iii) to set up a Monetary Award Fund to compensate those retired players found to have dementia, Alzheimer's Disease, Parkinson's Disease, and/or ALS, the representatives of deceased players who received one of these Qualifying Diagnoses while living, and certain deceased players diagnosed post-mortem with CTE.

35. We had demanded that a broad range of additional alleged injuries be compensated in the Settlement. The Defendants held firm in their willingness to compensate only objectively verifiable and serious injuries that the NFL Parties contended were supported by the available science. They seemed willing to accept the risk that opt-outs might pursue those additional conditions in litigation outside of the Settlement. Importantly, although not every retired player has been diagnosed with a qualifying injury today, all of the retired players are

eligible to seek a monetary award if and when their symptoms progress to a compensable level and a supplemental monetary award if their condition worsens after that.

36. We negotiated this overall Settlement value for all Class Members based on a number of factors, including, but not limited to, the expert opinions of our medical consultants, actuaries, and BAP and Claims Administrators with regard to (i) the costs necessary to conduct the BAP evaluations for all living retired players and to provide supplemental medical treatment and pharmaceuticals to those players diagnosed with moderate neurocognitive impairment and (ii) the science supporting the injuries to be compensated in the Settlement, the values of those injuries, and the projected incidence of retired players receiving Qualifying Diagnoses during the life of the Settlement. We also relied on our own assessment and belief that the \$765 million settlement figure was at the upper range of what the NFL Parties were willing to pay for a global resolution of Plaintiffs' claims.

37. As explained by the Mediator (*see* Phillips Supp. Decl. at ¶ 11), with one exception, the Settlement compensates retired players for deficits and diseases that they suffered from while living. A principal goal of the Settlement was to compensate those people and their families. Though the pathological diagnosis of CTE is not compensated as an injury prospectively, the most serious cognitive impairments developed in living retired players that have been associated in the literature with CTE are compensated (*i.e.*, Level 1.5 and Level 2). In addressing a potential resolution of pending claims, which included the claims of deceased retired players, one issue arose among the parties concerning how to address retired players who pre-deceased the Settlement, and thus had not sought the care of a neurologist or other neuro-specialist while living, but their families did obtain pathology of the retired player's brain, which reflected a pathological finding of CTE. Plaintiffs maintained that it was not fair to deprive the

families of those retired players of compensation where, in many cases, the players' death was sudden and unexpected, and neither the players nor their families were aware of the need or desire to obtain a diagnosis while living. Plaintiffs were able to secure recovery for the families of those individuals, and thus the "Death with CTE" injury definition was agreed to for pre-approval deaths with confirmed CTE from autopsy. *See Phillips Supp. Decl.* at ¶ 11.

38. Significantly, the proposed Settlement does not require Class Members to prove that their injuries were caused by or related to concussions suffered during NFL football play. Rather, Class Members need only demonstrate class membership and a qualifying injury in order to receive a monetary award, which is a remarkable result.

39. In addition, the Settlement provides for a mechanism to resolve certain governmental liens applicable to Class Members' monetary awards on a global basis so that these liens can be satisfied for a substantial reduction of their claimed amount, which will augment the net recovery for individual Plaintiffs and provide them with further benefits.⁵ Outside of this Settlement, it would be incredibly burdensome for an individual claimant to negotiate these lien reductions; however, Class Counsel was able to leverage the efficiencies provided through the class action vehicle to affirmatively represent Plaintiffs' collective interests in lien reduction and satisfaction.

40. A further benefit that we negotiated for Plaintiffs was to eliminate otherwise applicable statutes of limitations problems for the vast majority of Class Members. Even if a

⁵ Players will still be eligible to receive all of the Medicare benefits to which they are entitled. *See Affidavit of Matthew L. Garretson, ¶ 28(b),* filed herewith.

player retired decades ago and never filed suit against the NFL Parties, he may still be entitled to a baseline neuropsychological and neurological examination and a monetary award.⁶

41. Further, all Class Members' rights to pursue claims for worker's compensation or benefits under any applicable Collective Bargaining Agreement are preserved. Participation in the Settlement will not vitiate these rights. The NFL Parties also agreed not to enforce any releases or covenants not to sue previously executed by Class Members in connection with claims for the Neuro-Cognitive Disability Benefit under Article 65 of the current CBA, so that these Class Members may participate in the Settlement.⁷

42. In exchange for these valuable benefits, the parties, in consultation with their medical and actuarial experts, negotiated and agreed to four limited categories of appropriate, objective, and fair offsets that would be applied to the monetary awards of Class Members.⁸ These downward adjustments include: the player's age, if 45 or older, at the time of diagnosis of a qualifying injury; the incidence of a stroke or severe traumatic brain injury unrelated to football play resulting in loss of consciousness for more than 24 hours (*e.g.*, a severe car accident); failure to participate in the BAP, which is designed to provide early detection of a qualifying injury; and the number of seasons of active participation in NFL football play (which we considered indicative of and an objective substitute for exposure to injury). As structured, the

⁶ The only exception is for players who died before January 1, 2006, more than eight years ago. The representatives of these players will have an opportunity, however, to demonstrate that their wrongful death or survival claim is not barred by governing state law.

⁷ The NFL Parties had sought to deduct from the Plaintiffs' monetary awards previous cash or other financial incentives received by players under the NFL's medical or disability benefit programs. We successfully resisted that proposal in the agreement so that players may receive the full medical and disability benefits to which they are entitled without compromising their Settlement benefits.

⁸ The NFL Parties originally had requested that numerous offsets for a wide variety of individualized factors be applied to Plaintiffs' monetary awards. We successfully resisted including these offsets in the Settlement and negotiated a better result for the Plaintiffs.

Settlement does not favor the retired players who are suffering today from compensable injuries over those who have not been diagnosed, and who may or may not develop compensable injuries for many years. I insisted on, and received, inflation-adjusted Monetary Awards to protect claimants over the 65-year term of the Settlement.

43. Subclass Counsel each performed their own due diligence and independently assured themselves that the deal was fair and satisfied the needs of their respective Subclass members and Due Process.

44. In particular, Mr. Levin, as Subclass Counsel for players not diagnosed with any neurocognitive impairment but at increased risk for developing a range of neuromuscular and neurocognitive diseases associated with mild traumatic brain injuries, concluded that it was fair and reasonable to provide monetary awards for dementia, Alzheimer's Disease, Parkinson's Disease, and ALS, but not other alleged ailments or conditions. *See In re Oil Spill by the Oil Rig "Deepwater Horizon,"* 295 F.R.D. 112, 152, 154-56 (E.D. La. 2013) (rejecting objections that focused on "the Settlement's Matrix, arguing that it should contain different dollar values, different conditions, payments based on severity of disease and impairment, payments for relocation costs, and/or different standards of proof – essentially seeking to renegotiate Settlement terms that were negotiated at arm's length by Class Counsel and [defendant] over several months as part of a compromise of highly disputed claims."). He also insisted upon the inflation-adjusted Monetary Awards.

45. Additionally, Mr. Levin believes, as do I, that it is fair to provide monetary awards to the representatives of deceased players who were diagnosed post-mortem with CTE before preliminary approval of the Settlement but not afterwards, since previously the families of these players would not have known of the existence of the Settlement and would not have

known to test for symptoms that will be compensated under the Settlement.⁹ However, going forward, players will be aware of the opportunity to be tested through the BAP to determine any incidence of neurocognitive impairment, and they will be aware that the Settlement compensates players for dementia, Alzheimer's Disease, Parkinson's Disease, and ALS.

46. Notably, the Settling Parties did not discuss the issue of attorneys' fees at any point during the mediation sessions, except to defer the issue until after an agreement in principal was reached on all material Settlement terms providing benefits to the Settlement Class and Subclass Members, in accordance with *Prandini v. National Tea Co.*, 585 F.2d 47, 53 (3d Cir. 1978).¹⁰ In fact, we agreed to the Term Sheet and agreed to settle Plaintiffs' claims on a global basis even though at that time there was no agreement on attorneys' fees and regardless of whether an agreement was ever reached on this issue. *See* Phillips Supp. Decl. at ¶ 18. In other words, we did not allow the issue of attorneys' fees to impede the resolution of the litigation. We agreed to go forward with this deal, and apply for fees at a later time, subject to Court approval.

47. In announcing the Settlement on the public record, the Court reserved judgment on the fairness and adequacy of the Settlement pending the Settling Parties' presentation to the Court of a formal Settlement Agreement, along with motions for preliminary and final approval. *Id.*

48. The existence of the Settlement was widely publicized in the press and in the media almost immediately after it was announced.

⁹ CTE may only be diagnosed post-mortem. There is no medically sound basis for a diagnosis of CTE in a living person. *See* Declaration of Kenneth C. Fischer, M.D., ¶ 10, filed herewith. Even the Objectors acknowledge as much.

¹⁰ *But cf. Evans v. Jeff D.*, 475 U.S. 717, 737-38 & n.30 (1986) (holding that in civil rights cases and class actions "simultaneous negotiations of a defendant's liability on the merits and his liability for his opponent's attorney's fees" is not prohibited).

**NEGOTIATION OF DETAILED SETTLEMENT AGREEMENT
AND ATTORNEYS' FEES PROVISION**

49. Following execution of the Term Sheet, the parties devoted the next four months to negotiating a definitive 85-page single-spaced Settlement Agreement with five (5) exhibits, including injury definitions, testing protocols, a monetary award grid, proposed class notices and a Notice Plan, and a proposed Final Order and Judgment. Numerous drafts of the Agreement and the various exhibits were exchanged by the parties and reviewed by Subclass Representatives.

50. During this process, we continued to consult with our medical, actuarial, economic, and claims and lien administrative experts (i) to ensure that the BAP would be sufficiently funded for a period of ten (10) years to provide a baseline neuropsychological and neurological examination to every eligible retired football player in order to determine whether he suffers from any cognitive impairment, and if so, to what degree and (ii) to satisfy our concerns that there would be sufficient funds during the 65-year life of the Monetary Award Fund to fairly compensate all Retired NFL Football Players receiving a Qualifying Diagnosis during their lifetime with an adequate cash Monetary Award and/or Supplemental Monetary Award should the player's condition worsen over time, based on the retired player's age at the time of diagnosis, the number of NFL Football seasons played, and other applicable offsets agreed to by the Settling Parties.

51. The parties reached an agreement to pay significant, "full value" maximum awards for each injury category (\$5 million for ALS, \$4 million for Death with CTE, \$3.5 million for Alzheimer's Disease, \$3.5 million for Parkinson's Disease, \$3 million for Level 2

Neurocognitive Impairment, and \$1.5 million for Level 1.5 Nuerocognitive Impairment).¹¹ All monetary payments on the grid will be subject to an annual inflation adjustment, after the Effective Date, not to exceed two and a half percent (2.5%),¹² to protect the value of these awards for players who have not yet been diagnosed with a qualifying injury.

52. The parties also negotiated the details of the offsets to be applied to the compensation awards, which appropriately took into account the age a player is diagnosed, whether the player suffered a stroke or Traumatic Brain Injury unrelated to football play, the number of seasons a player was active in the NFL, and whether the player elected not to participate in the BAP. These offsets were aggressively negotiated by Co-Lead Class Counsel and the NFL Parties, and concessions and trade-offs were made by both sides.

53. In addition, Plaintiffs consulted with a class notice expert designated to serve as the Notice agent responsible for ensuring that the Notice Plan, the reach of publication notice, and the Court-approved Settlement Website and Call Center satisfied Rule 23 and Due Process.

54. Eventually, the parties discussed the payment of attorneys' fees separate and apart from all other Settlement benefits, and the NFL Parties agreed not to object to a petition for an award of attorneys' fees and reasonable incurred costs by Class Counsel, provided the amount requested does not exceed \$112.5 million. In the event these attorneys' fees and costs are

¹¹ Recognizing her duty to Subclass 2 as a whole, Ms. Nast did not try to favor a particular injury category within the subclass. Objectively, however, it was Ms. Nast's view, and the view of all Plaintiffs' counsel, that it was reasonable that a diagnosis of ALS would be entitled to a larger award given the fact that ALS is a rapidly progressive neurological disease that attacks the nerve cells in the brain and spinal cord and affects the muscles throughout the body, and invariably leads to death, usually within three (3) to five (5) years after the onset of symptoms.

¹² Settlement Agreement, Section 6.9 (the precise amount of the inflation adjustment will be "subject to the sound judgment of the Special Master (or the Court after expiration of the term of the Special Master) based on consideration of the Consumer Price Index for Urban Consumers (CPI-U)").

awarded by the Court, the NFL Parties will pay them on top of the other Settlement benefits. Unlike traditional common fund cases where attorneys' fees are obtained directly from the common fund, the Settlement Class is further benefitted by the separate payment of attorneys' fees by the NFL Parties. The parties contemplate that any petition for attorneys' fees and costs will be made at an appropriate time after final approval of the Settlement and that Settlement Class Members will have an opportunity to comment on or object to these fees.

55. Due to the long term of this Settlement (65 years) and the necessary involvement of Class Counsel to ensure that the terms of the Settlement are met and that Class Members' rights and interests are protected, Class Counsel included in the Agreement a provision that contemplates a petition to the Court to set aside up to five percent (5%) of each monetary award and Derivative Claimant award to facilitate the Settlement program and related efforts of Class Counsel.¹³ In the event a Class Member is represented by individual counsel, the attorney's fee payable to that counsel will be reduced by the amount of the "set-aside," if approved by the Court, so that the set-aside will in no way increase fees paid by anyone who hired a contingent fee lawyer. These monies will be held in a separate fund overseen by the Court. The NFL Parties have taken no position on this issue. This provision was included in the class notice.

56. At all times, the Subclass Representatives, through their counsel, stayed abreast and informed of the Settlement negotiations, and they reviewed multiple drafts of the Agreement and accompanying exhibits.

APPOINTMENT OF SPECIAL MASTER

57. On December 16, 2013, pursuant to Fed. R. Civ. P. 53, the Court appointed Perry Golkin to serve as Special Master to assist the Court in evaluating the financial aspects of the

¹³ Settlement Agreement, Section 21.1.

proposed Settlement in view of its financial complexities. Mr. Golkin agreed to serve in this capacity without compensation. On several occasions, the parties met with Mr. Golkin jointly and individually, in person and telephonically. Each side provided the Special Master with access to the actuarial reports of their experts supporting the value and terms of the Settlement. These reports have since been filed on the litigation docket.

PRELIMINARY APPROVAL

58. On January 6, 2014, Co-Lead Counsel filed Plaintiffs' Class Action Complaint on behalf of a class of persons consisting of:

(1) All living NFL Football Players who, prior to the date of the Preliminary Approval and Class Certification Order, retired, formally or informally, from playing professional football with the NFL or any Member Club, including American Football League, World League of American Football, NFL Europe League and NFL Europa League players, or were formerly on any roster, including preseason, regular season, or postseason, of any such Member Club or league and who no longer are under contract to a Member Club and are not seeking active employment as players with any Member Club, whether signed to a roster or signed to any practice squad, developmental squad, or taxi squad of a Member Club ("Retired NFL Football Players"); (2) Authorized representatives, ordered by a court or other official of competent jurisdiction under applicable state law, of deceased or legally incapacitated or incompetent Retired NFL Football Players ("Representative Claimants"); and (3) Spouses, parents, children who are dependents, or any other persons who properly under applicable state law assert the right to sue independently or derivatively by reason of their relationship with a Retired NFL Football Player or deceased Retired NFL Football Player ("Derivative Claimants") [see ECF No. 5634-1, ¶ 16].

59. Persons who tried out for an NFL Member Club or team of the American Football League, World League of American Football, NFL Europe League or NFL Europa League, but did not make a preseason, regular season or postseason roster, practice squad, developmental squad, or taxi squad, are not included in the proposed Settlement Class.

60. On January 6, 2014, the parties submitted the Settlement Agreement to the Court for Preliminary Approval [ECF No. 5634]. On January 14, 2014, the Court denied Plaintiffs' motion without prejudice [*see* ECF Nos. 5657 and 5658], expressing concern regarding the adequacy of the funding for the MAF to compensate all eligible Class Members throughout the 65-year lifespan of the Settlement. The Court ordered the parties to share with the Court, through the Special Master, the actuarial analyses they relied upon in reaching their Agreement.

FURTHER NEGOTIATIONS AND UNCAPPING OF THE SETTLEMENT

61. Having heard and appreciated the Court's concerns, the parties worked extensively with the Special Master over a five-month period to negotiate, in good faith and at arm's-length, a new 95-page, single-spaced Class Action Settlement dated June 25, 2014 that will resolve all claims against the NFL Parties and other Released Parties in this MDL and Related Lawsuits. Through this process, which was often adversarial, the NFL Parties agreed to uncap the amount of the Monetary Award Fund and promised to pay all valid claims for monetary awards, in order to address the Court's concern that all eligible Class Members over the 65-year lifespan of the deal need to be compensated at the significant award levels for which the deal provided. Nevertheless, we still support and stand behind the reasonableness of our experts' earlier actuarial assumptions. It was the reasonableness of these assumptions and those of the NFL Parties that made possible the uncapping of the Monetary Award Fund.

62. Staying true to the initial deal, Plaintiffs insisted upon maintaining the same significant monetary award levels for Class Members and maintaining the NFL Parties' obligation to pay for the costs and expenses of claims administration. For their part, the NFL Parties insisted upon including detailed measures in the administration process to protect against fraud, including the right to reasonably appeal monetary awards in good faith.

63. Another benefit achieved for Plaintiffs was the elimination of a requirement from the earlier Settlement that Class Members who receive monetary awards agree to release claims against the National Collegiate Athletic Association and/or other collegiate, amateur or youth football organizations and entities.

64. Further, the expenses of claims administration and the costs of the Special Master will be paid by the NFL Parties in addition to monetary awards paid to Class Members. This is an additional benefit for retired players, since, typically, these costs are paid from a capped fund that compensates claimants.

65. Subclass Representatives Kevin Turner and Shawn Wooden, through their counsel, filed the Settlement with Court and sought Preliminary Approval of the Settlement and conditional certification of the proposed Class and Subclasses pursuant to Fed. R. Civ. P. 23(a)(1)-(4), 23(b)(3), and 23(e) [ECF No. 6073].

66. On July 7, 2014, the Court entered an Order preliminarily approving the Settlement and conditionally certifying the Settlement Class and two Subclasses [ECF No. 6084]. In its Preliminary Approval Order, the Court appointed Christopher A. Seeger, Sol Weiss, Steven C. Marks, Gene Locks, Arnold Levin, and Dianne M. Nast to serve as Class Counsel (*id.*, ¶ 3(a)). The Court also appointed Co-Lead Counsel as Co-Lead Class Counsel (*id.*, ¶ 3(b)), and designated Mr. Levin as Subclass Counsel for Subclass 1 and Ms. Nast as Subclass Counsel for Subclass 2 (*id.*, ¶ 3(c)).

67. The Court appointed Shawn Wooden to serve as Subclass Representative for Subclass 1 (*id.*, ¶ 2(c)(i)) and Kevin Turner to serve as Subclass Representative for Subclass 2 (*id.*, ¶ 2(c)(ii)).

68. The Court also appointed preliminarily a BAP Administrator, a Claims Administrator, a Lien Administrator, and a Trustee (*id.*, ¶ 3(e), (f), (g)).

69. The Court appointed a Settlement Class Notice Agent (*id.*, ¶ 3(h)), authorized the dissemination of Class notice (*id.*, ¶ 4), approved the Notice Plan, set an Opt-Out/Objection deadline of October, 14, 2014 (*id.*, ¶ 4(g), (h)), and scheduled a fairness hearing for November 19, 2014 (*id.*, ¶ 5).

70. The Settlement has been widely publicized in the press, as well as through formal class notice (*see* attached media analysis and reports). There have been more than 900 print and online stories about the Settlement since its announcement on August 29, 2013. There has been coverage by the top 25 publications in the country via their websites and/or in print, including the Associate Press, whose stories ran on the national wire, which is available to 1,400 of the Associated Press' U.S. daily newspaper members. In addition, details of the Settlement were covered in national broadcasts and news programs on ESPN, CNN, FOX News, NBC, ABC, CBS, MSNBC, Al Jazeera, NPF, CNBC, NFL Network, Fox Sports 1, HLN, Bloomberg, Comcast Sports Network, and PBS, as well as on countless local stations. Further, there were more than 160 million unique online visitors to Sports Illustrated, ESPN, Pro Football Talk, and Yahoo! Sports, where numerous articles about the Settlement appeared.

71. The reaction of the Class has been extremely favorable. As of the Opt-Out/Objection deadline, fewer than 1% of Retired NFL Football Players filed requests for exclusion from the Settlement. *See* Opt Out Report Submitted by Claims Administrator [ECF No. 6340] at ¶ 3. In a case as highly publicized as this one, where significant claims are at stake, and more than 5,000 individual actions were filed in the MDL alone, this positive response of Class Members should be given great weight. As of October 14, 2014, the deadline for requests

for exclusion, the Settlement Website, www.NFLConcussionSettlement.com, has had 62,989 unique visitors. *See* Declaration of Orran Brown (“Brown Decl.”), ¶ 43, filed herewith; Declaration of Katherine Kinsella (“Kinsella Decl.”), ¶ 26, filed herewith. The Settlement Call Center has received inquiries from 4,125 callers. *See* Kinsella Decl., ¶ 28; Declaration of Edward J. Radetich, ¶ 9, filed herewith. In addition, even though formal registration for Settlement benefits will not begin until after the Settlement has achieved final judicial approval (and after all appeals have been resolved or the time for appeal has expired), over 5,000 potential Settlement beneficiaries have registered to receive further notices regarding the Settlement and claims process, through the many means we have set up for beneficiaries to communicate with the Settlement Administrator. *See* Brown Decl., Attachment 7. For a class of approximately 20,000 Retired NFL Players, this high level of favorable response is remarkable, especially in the face of websites set up by the Objectors (e.g., nflconcussionsettlementfacts.com, Dave Pear blogs, Playerscongress.com, etc.), where they and/or their counsel have openly and vigorously encouraged players to opt out or object. Even with these detractors, less than 1% of the class opted out and less than 1% has objected, and many of these opts-outs and objections were filed on standard forms obtained through the Objectors’ websites.

72. Even though the objections filed in response to the Settlement lack merit, because they do not consider the realities of the risks of litigation and what can be achieved through hard-fought, arm’s-length negotiations, the Settling Parties are continuing to evaluate the terms of the Settlement to provide additional benefits where possible.

73. Based on my extensive experience trying multiple bellwether cases in multidistrict litigation and settling many class actions involving catastrophic and other personal injury claims, and based on my familiarity with the value of Plaintiffs’ claims in this litigation

and the information made available to me during the negotiations, and the potential defenses of the NFL Parties, I firmly believe that the proposed Settlement is fundamentally fair and reasonable, because it will provide immediate and substantial benefits to deserving Class Members and maintain an available monetary fund for 65 years so that undiagnosed Class Members may seek a monetary award if and when their symptoms progress to a compensable level and a supplemental monetary award if their condition worsens after that.

I declare under penalty of perjury that the foregoing is true and correct.

Executed this 12th day of November, 2014.

CHRISTOPHER A. SEEGER
Co-Lead Class Counsel
